PROJECT

- **Grocery Admin Dashboard :** Worked as full Stack Developer, developed a grocery product dashboard using ES6, Next.js, React, and MongoDB. It allows the admin to perform CRUD operations, track product sales (daily, weekly, monthly), and view data using charts and visualizations. Integrated Axios for API requests, React-ChartJS-2 for analytics, Next AUTH for authentication, React Hook Form for forms, React Toastify for notifications, and React Stars for user reviews. - **Book Haven :** Developed a book e- commerce website with an admin panel using ES6, Next.js, React, and MongoDB. The admin panel enables CRUD operations to add or remove books and manage inventory. Implemented role-based authentication for secure access, JWT for user authentication, bcryptjs for password hashing, React Hook Form for form handling, and Axios for API communication. **Github Link:**- https://github.com/Priyanshu-89/bookheaven

- **Tasty Wheels :** Worked as full Stack Developer, Designed and developed a robust food delivery web app using Next.js, React.js, Node.js, and MongoDB. Implemented user authentication and role-based authorization with a secure backend to ensure data privacy. Built a responsive and dynamic frontend for seamless navigation and user interaction. Integrated RESTful APIs for efficient data communication, enabling smooth login, signup, and order management, enhancing user experience and application security.
